

METHOD OF COLLECTION

EXPECTORATION

IMPORTANT

IF YOU HAVE DIFFERENT TYPES OF SAMPLES TO TAKE, THE BLOOD SAMPLE SHOULD ALWAYS BE TAKEN LAST.

MATERIAL

To perform this sampling, we provide you with:

- 1 sterile container.

IMPORTANT

Ideally, the sample should be taken after rinsing the mouth with cold water.

STEP 1

Write your name, surname, date of birth, date and time of collection on the label of the tube provided.

STEP 2

Wash your hands thoroughly.

STEP 3

No saliva is required for sputum collection. It is important that the sputum (phlegm) is coughed up from the back of the throat.

STEP 4

Close the tube and place it in the bag provided for this purpose.
